

# POINT OF SALE

## Omni-Channel Connectivity

Secure, Resilient & Flexible  
Retail & Hospitality Connectivity

A hand is shown interacting with a tablet POS system. The screen displays a menu with categories like BREAKFAST, BRUNCH, STARTERS & ROTISSERIE, SANDWICH, SALAD BOWL, and SOUP. There are also buttons for Payments, Cash, and Check Out. The background shows a blurred view of a cafe counter with various items.

**Designed for  
Maximum Uptime**

# Secure, Resilient & Flexible Retail & Hospitality Connectivity

Transform your hospitality or retail business with Caburn Telecom's managed IoT router service.

Secure and resilient connectivity to maximise your revenue, minimise delays and streamline your operations.

# Are you ready to take your hospitality or retail business to the next

# RETAIL

**Connecting many devices in-store means critical elements need to be prioritised.**

**Payment & consumer transaction data needs to be expedited.**

**This data needs to be encrypted and secure.**

**Connectivity must be available anywhere in-store.**

**Various devices need to be securely connected and managed.**

**Systems must allow seamless omni-channel integration.**

# In a Rapidly Changing World, Offer Greater Consumer Choice...

- Consumers are becoming more sophisticated and as a result retail stores and events are becoming more complex.
- Stores need to process payments quickly and offer process choices for consumers.
- This means sales personnel need to be more active and mobile.
- Others need to be offered self service points to complete the transaction in their own time.
- Self-service tends to increase transaction revenues via additional purchases and accessories.
- Stock which is not in-store can be ordered for pick up or home-delivery.
- If not rapidly, consumers will leave the store or may order elsewhere or online using their smartphones.

# **RESTAURANT, BAR & HOSPITALITY**

**Present Choices Efficiently**

**Receive and Transfer Selections Accurately**

**Minimise Queues and Delays**

**Resilient Table Service Connections**

**Maximise Consumer Choice**

**Expand Services and Revenues**

**Connect Self-Service Points**

**Process Transactions Promptly**

# In a Rapidly Changing World, Offer Immediate Service...

- High-Quality service consistency is key to customer hospitality experiences.
- Poor experiences, queues or delays mean customers may become frustrated and go elsewhere.
- Higher footfall means greater user and potential signal congestion.
- Hospitality environments are becoming more sophisticated and multi-faceted.
- Venues and events are more experiential and consumer centric.
- Service personnel need to be more active and mobile.
- Businesses need to process customer choices and payments more quickly.
- Need to offer multiple processes as a choice for consumers, including self-service options.
- Positive experiences lead to favourable (electronic) word of mouth and reputation growth.

# Our Seamless Connectivity Solutions Provide Security, Resilience and Control

Point of Sale

Secure Wi-fi/LAN

Resilient 4G/5G

Private Networks

Expert Support

# Offers instant 4G connectivity for any Retail or Hospitality application

Our Router sends data via a 4G SIM, providing an encrypted connection to the internet on sites where wired broadband is unavailable, impractical or slow. Our 4G back-up option upgrades an existing broadband service to a private network, providing a reliable failover business solution if your wired broadband goes down.

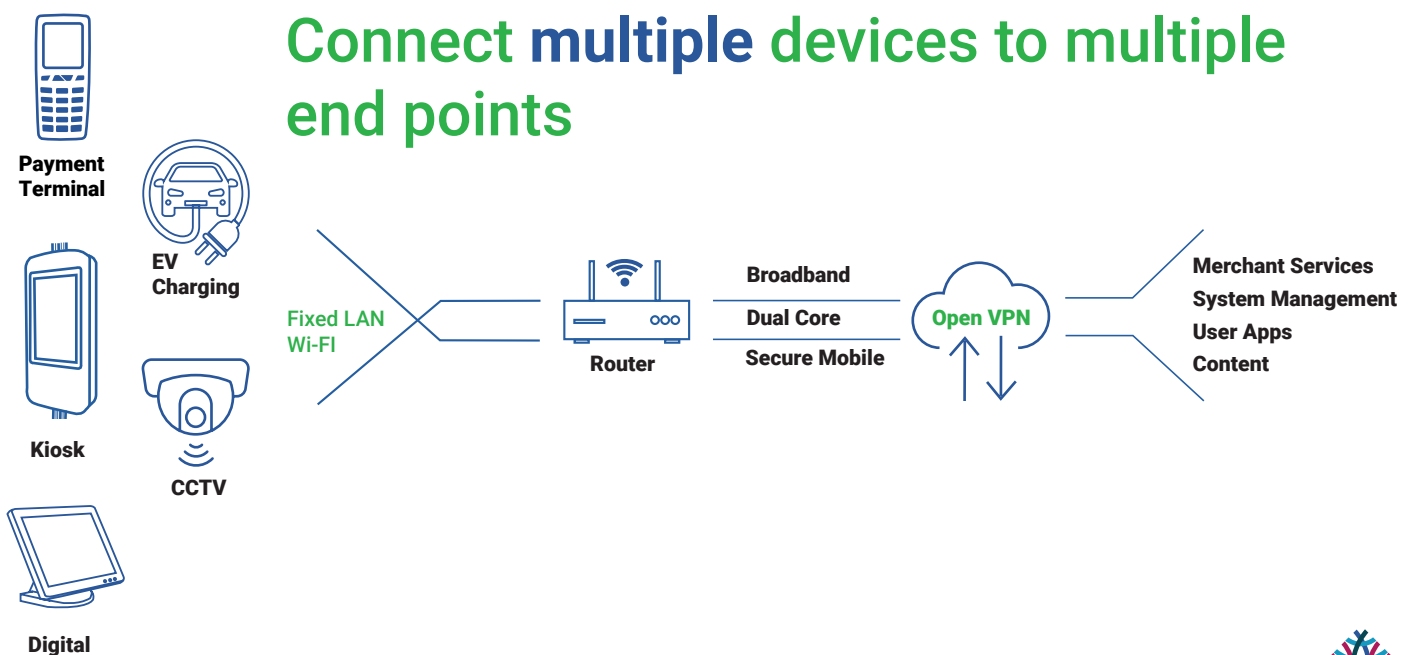

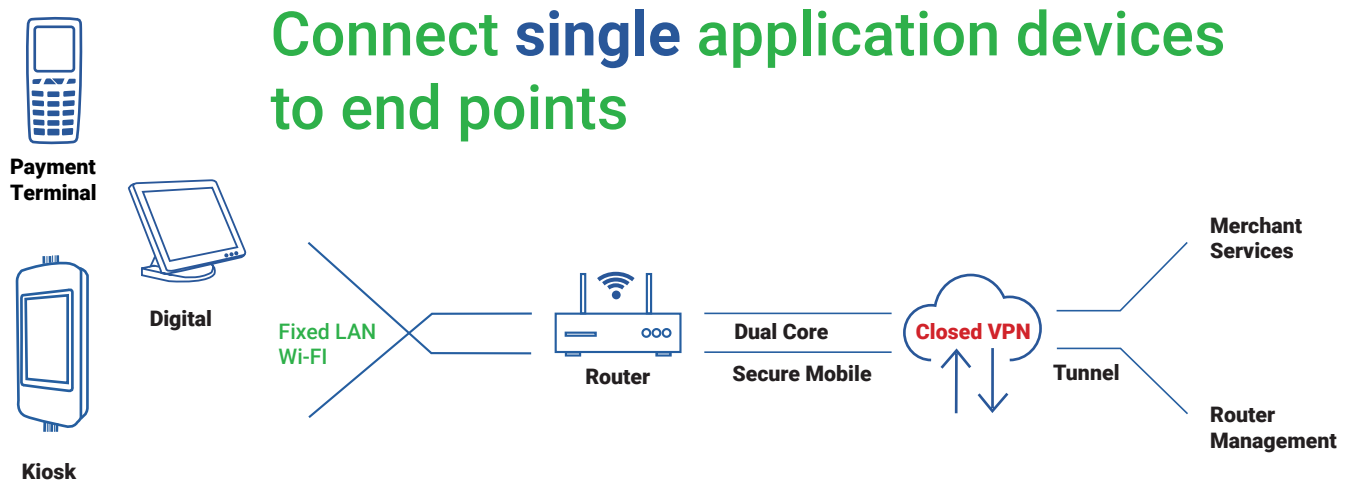

Single and Managed Multi-Path options are available depending on the installation, utilising a combination of 4G, IP, xDSL and FTTC connectivity. It is available as a self-monitoring solution with the ability to upgrade to a full Alarm Receiving Centre Connection. All variants arrive pre-configured for quick installation and are supplied with the appropriate monthly data SIM bundle to help manage costs.
